1 RESOURCE

Lexica

Text-based image generators are popular. This site is based on the "Stable Diffusion" generator. It proposes either to carry out a reverse image search, and the site will display images similar to the one uploaded, or from the input of a text written in English:

- to find in the request history a picture that best matches the request
- to generate 4 new pictures related to the request (you will need to create an account for the latter option).

1 CURRENT EVENT IN EDUCATION

The European AI4T project

"The AI4T project - Artificial Intelligence for and by teachers - is a three-year experimental project aiming at exploring and supporting the use of artificial intelligence in education. AI4T consists in implementing innovative teacher training methods (MOOC, hackathon, datathon...) specifically designed to address the challenges of AI in education."

1 AI APP

Are movie stars immortal now?

Thanks to deepfake technology, many applications are now possible, such as interviewing Steve Jobs who died in 2011 or finding our favourite stars at the cinema.
